Vikas Nagar

Kota, Rajasthan | nagarvikas2003@gmail.com | +91 9785285563 | linkedin.com/in/vikas31 | github.com/vikasnagar31

PROFESSIONAL SUMMARY

Entry-level Data Scientist with hands-on experience across the full machine learning lifecycle: data cleaning, feature engineering, model building, and deployment. Proficient in Python, SQL, and Scikit-learn, with a track record of building classification, clustering, and recommendation systems that turn raw data into measurable business impact. Strong foundation in statistical analysis and model evaluation, with a focus on clean, production-ready code.

TECHNICAL SKILLS

Programming: Python, SQL (Joins, CTEs, Window Functions, Subqueries, Aggregations)

Data Analysis & Statistics: Exploratory Data Analysis, Data Cleaning & Preprocessing, Feature Engineering & Selection, Statistical Analysis, Hypothesis Testing, Predictive Modeling

Machine Learning: Supervised & Unsupervised Learning, Classification, Regression, Clustering, NLP, Recommendation Systems, Model Evaluation, Cross-Validation, Hyperparameter Tuning

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, SHAP, Matplotlib, Seaborn, SciPy, Statsmodels, imbalanced-learn, MLxtend, NLTK

Tools & BI: Excel, Power BI, Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Microsoft SQL Server

PROJECTS

E-Commerce Customer Analytics Platform | GitHub

Feb 2026 – Apr 2026

Python, Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, SHAP, Streamlit, Git

- Engineered a Customer360 dataset from 742K+ transactions, 22K customers, and 42K products, creating 118 behavioral features spanning RFM, category affinity, and loyalty metrics.
- Architected an end to end leakage-proof Scikit-learn pipeline with custom transformers for preprocessing, feature selection, and hyperparameter tuning across 6 classification models.
- Delivered 98.9% AUC for High-Spender prediction and 95.6% AUC for Churn detection; diagnosed and resolved a critical target-leakage bug in churn labeling.
- Leveraged SHAP explainability to surface key business drivers and deployed an interactive Streamlit dashboard for automated scoring, revealing that the top 2.75% of customers generate 18.1x more revenue than the bottom 76.8%.

Telecom Customer Behavioral Segmentation | GitHub

Oct 2025 – Dec 2025

Python, Pandas, NumPy, Matplotlib, Scikit-learn, K-Means, MLxtend, Streamlit, Git

- Segmented 1,000+ telecom users into 6 distinct behavioral groups using K-Means, Agglomerative Clustering, and DBSCAN, validated with the Elbow Method and Silhouette Score.
- Uncovered a high-value segment representing 3% of customers with 5.1x higher income and 7.7x higher loyalty, enabling targeted retention strategies to optimize marketing ROI.
- Implemented Apriori Association Rule Mining across 13 services, surfacing cross-sell bundles with 91% confidence and 3.07 lift.
- Automated model training and batch scoring in a modular Python pipeline and developed a Streamlit dashboard for KPI visualization and reporting.

Movie Recommendation System (CineMatch) | GitHub

Jun 2025 – Jul 2025

Python, Pandas, Scikit-learn, Streamlit, OMDb API, Git

- Built a content-based recommendation engine on 7,692 MovieLens titles using 19 genre and year features with cosine similarity to generate Top-5 recommendations.
- Standardized the dataset by fixing 1,113 malformed titles, removing duplicates, and filtering records to 1985–2018 for relevance.
- Launched an interactive Streamlit application with real-time OMDb API integration, delivering posters, ratings, and instant recommendations.

CERTIFICATIONS & ACHIEVEMENTS

- **Advanced Certification in Data Science & AI** – E&ICT Academy, IIT Guwahati — *Aug 2024 – May 2025*
- **Certified Data Scientist** – AnalytixLabs — *May 2025*
- **Certified Data Analyst (Python)** – AnalytixLabs — *Feb 2025*
- **Certified Data Analyst (Excel, SQL & Power BI)** – AnalytixLabs — *Nov 2024*
- **Data Science with AI Training** – Internshala Trainings — *Sep 2023*
- **Data Science Course** – National Skill Development Corporation — *Sep 2023*

EDUCATION

B.Tech in Computer Science Engineering

2021 – 2025

Modi Institute of Technology, Kota | CGPA: 8.1/10.0

Final Year Project: Credit Risk Analysis – Probability of Default Model with 88% accuracy, minimizing banking credit risk
